

FOR IMMEDIATE RELEASE

Matt Bowen joins Orange Tree Technologies Ltd

Oxford, UK, 25th November 2003 - Orange Tree Technologies Ltd announces that Matt Bowen has joined to head up Software Development.

Orange Tree Technologies, the leading developer of FPGA-based products, is pleased to announce that Matt Bowen has joined to head up their Software Development team. His responsibilities include building the team to develop software and board drivers for Windows, Linux and VxWorks.

Matt joins from Celoxica, the EDA startup, where he was the first person employed by the founders. He wrote the first commercial version of the FPGA programming tool Handel-C and then led the development of their EDA toolkit DK2.

Charles Sweeney, Orange Tree Technologies Founder, commented "We are thrilled that Matt is joining us at such an important stage in our development. I have known Matt for several years and have seen what he has achieved. He has just the right skills to make a major contribution in taking this company forward."

About Orange Tree Technologies

Founded in October 2001 by Charles Sweeney, previously a Co-founder of the EDA company Celoxica, Orange Tree Technologies is committed to providing the highest performance FPGA-based platforms. These modules plug into a variety of systems to deliver extreme data processing performance. Target markets include military, aerospace, telecommunications, imaging and machine vision, and industrial control. The website is www.orangetreotech.com
